

**9'1" MK2 MODEL**

The latest development from Schaper/Perkins is the 9'1" MK2 model. The MK2 is noticeably thinner than the original Bonga with lower volume rails. Designed for small to medium-sized surf, the vee and roll have been flattened to create a quicker "out-of-the-gate" feel. This enhancement is combined with our latest rocker and a slightly narrower nose and tail. It's the next step in high-performance Longboards."

9'1"

10'0"

**BONGA 10'0"**

Bonga's high-performance, wave riding stand-up design. The most noticeable feature of the design is the step-deck and rail. This unique configuration creates a full volume board with disproportionately thin rails. The thinner rails allow the board to bottom turn, carve and fit in the pocket much like a standard longboard. Already a proven contest winner, it's designed as a dedicated in-the-surf Stand-up.
