

**MAGIC MODEL SUP**

**10'10"** The Walden Magic SUP integrates the famous original Magic Model rocker combined with concaves for stability and V-bottom for turning. This makes the ride loose yet stable and turning is easy.

Completely versatile for surf or cruising flat water. As stable as a much longer board with the width and concave. It also features a 3/4 length traction pad that is counter sunk into the deck of the board.

In addition this board features a step deck design to maximise volume without compromising performance.

The Walden SUP comes with a 9" centre fin and FCS SW side fins.

**9'11"** This is the new, smaller version in the Walden Magic SUP series. The 9'11" Magic SUP has the same design elements as the 10'10 Magic SUP that has become know as "The Padillac" but with reduced volume in thickness and length. The 9'11" is designed for a smaller person who is a beginner - intermediate up to approx. 180 lbs. or a better surfer up to 225 lbs. who prefers less volume in their SUP rides.

The new 9'11" Magic SUP is built with the Magic model elements which include beveled rails for maneuverability and a concave bottom very stability . The 9'11" Magic SUP is a great addition to the Magic series, it even nose rides.
