

FATBURNER - SLX

The Fatburner has evolved into a slightly more subtle version of its chunky former self. While the Afterburner has become more fishy, the new Fatburner has been refined by maintaining, but hiding the much desired volume into a much sexier package. The nose, tail and rails are a touch finer, yet the center thickness is slightly increased to offset these refinements. This is a great paddling, easy riding, true fish shape, but with its super smooth rocker and straighter tail plan shape there is a degree of hold uncommon in most fish shapes. This hold and stability makes for a surprising ride in bigger waves. The big guy's all rounder!

All boards are glassed with 2 x 4oz and a 3/4 4oz patch on the deck and 1 x 4oz bottom with a patch on the fin area. We give the boards the silky smooth Pro finish and they come standard with FCS M5 Glassflex Series fins.
