

MAGIC MODEL

The Magic Model is one of the most sophisticated Longboards ever designed. Originally built in 1981, the Magic Model was years ahead of its time and has become the prototype of the modern Longboard. The Original Magic Model has been tested and improved for over twenty five years and today its performance is unmatched. The Magic Model is a great nose riding board, yet it is still an unbelievable all around performance Longboard. The Original Magic is unique in that it is recommended for both beginner surfers as well as advanced surfers. It works well in small surf and giant surf. The combination of stability, maneuverability and speed make the magic model ride easy yet exciting. The Magic Model is designed with a concave nose flowing to the middle of the board that transitions into double concave hulls extending to the tail with a moderate vee. Rails are hard from the nose to the tail to maintain responsiveness in all conditions. Although the rails tend to be harder than most other Longboards, the unique bottom curve and beveled rails keep them from catching like most other hard rail boards.

2009 marks the Original Magic Models 25th anniversary, It is our all time best selling board because it simply rides like magic.

All boards are glassed with a 2 x 6oz deck and 1 x 6oz bottom with a patch on the fin area. We give the boards the gloss polished finish and they come standard with 7" on the boards up to 9'0" and 8" Walden Center fin on the larger models, all come with FCS Walden M Series Glassflex side fins.
