

MAGIC MODEL SUP

The Walden Magic SUP integrates the famous original Magic Model rocker combined with concaves for stability and V-bottom for turning. This makes the ride loose yet stable and turning is easy.

Completely versatile for surf or cruising flat water. As stable as a much longer board with the width and concave. It also features a 3/4 length traction pad that is counter sunk into the deck of the board.

In addition this board features a step deck design to maximise volume without compromising performance.

The Walden SUP comes with a 9" centre fin and FCS SW side fins.

10'10" SUP
