

SHORTBOARD - SLX

The short board has medium rocker for a balance between drive and maneuverability, and a deep double concave for a balance between bite and forgiveness. After 20 years of designing surfboards for professional surfers, Greg has refined the high performance short board to have as much speed and response as the best can handle, while adding a degree of forgiveness which is as necessary for the best as it is for the thousands of competent surfers out there. The two concaves create the turbo like speed increase, with the vee acting like a silky smooth gear box, interlinking turns without conscious thought.

All boards are glassed with a 2 x 4oz and a 3/4 length patch on the deck and 1 x 4oz bottom with a patch on the fin area. We give the boards the silky smooth Pro finish and they come standard with FCS M5 Glassflex Series fins.
