

# ORIGINAL - SLX

The McTavish Original model was the first model to really bring modern longboarding into the 21st Century!

The board has a radical 3-stage rocker, with a flat centre section for fast paddling, and a flipped nose and tail for fast, loose, down-the-line surfing. The trim channels in the nose add lift, and also give great control while noseriding. The template has a wide, stable nose, and a big hip in the tail, which makes rail to rail transition smooth and controlled. This board works best with a bit of weight stripped out, and the SLX epoxy construction delivers this perfectly.

The Original is an ideal addition to any shortboarders quiver, or a high-performance option for the fish/longboard crew.
