

AFTERBURNER

The Afterburner maintains the overall theme that has made this design synonymous with the concept of the all rounder. The new addition of the nose to tail double concave has extended the speed of the board without losing an ounce of the flow, freedom and range of use that board has always had.

Greg perfected the deep double after many years of using the deep double concave through the tail of the Afterburner. He has also slightly increased nose and centre width, so that the new Afterburner is a touch more fish-like, making it about halfway between a short board and a true fish.

All boards are glassed with a 2 x 4oz and a 3/4 length patch on the deck and 1 x 4oz bottom with a patch on the fin area. We give the boards the silky smooth Pro finish and they come standard with FCS M5 Glassflex Series fins.
