

QUICKSHIFT

Aloha

The QUICKSHIFT continues to be one of the most popular boards in the Aloha range. Easy on the eye and even easier to ride, this board features a fuller outline through the nose and tail while still maintaining the standard width of a typical performance board.

A lower entry rocker makes for easy paddling and faster acceleration while the smooth yet progressive tail rocker helps sustain the boards maneuverability and response. A curved swallowtail adds bite and the single-to-double concave maintains the board's sensitivity. Extra flip in the nose has also been added to prevent nose-diving in steeper waves.

Forgiving yet still performance based, this is the perfect alternative to the high performance AF models and will suit surfers who are looking to make the transition from a refined Shortboard or a larger hybrid design.

The QUICKSHIFT comes with a tri-quad fin configuration allowing it to be set up as a thruster or a quad.
