

A-777

The A-777 has been designed to fill a gap in our range and to give retailers what they have been getting requests for from consumers. The board is designed as a great first shortboard. It is generous in width but not too thick so it gives the surfer a great stable platform to work with. The rounded tail allows for a greater surface area for the rider to push off when doing turns. Nose and tail rockers are moderate and allow for easy transitions from paddling to planing to turning on the face of the wave. There are 4 sizes to suit small to larger surfers.

All boards are glassed with a 2 x 4oz deck and 1 x 4oz bottom with a patch on the fin area. We give the boards the silky smooth Pro Finish and they come standard with FCS M5 Glassflex Series fins.
