

SUPERFISH

The Super Fish is one of the most popular boards in the GSI range and continues to win converts worldwide. The reason for the Super Fish's success is that it blends high performance surfing with wave catching ability. The step deck design is the magic element.

The step deck gives the board lots of volume under your chest for buoyancy and the low volume rails allow you to really dig deep when you turn, as if you were riding a performance shortboard. It is the best of both worlds. Paddle power and performance.

The Super Fish also has the optional tri/quad fin setup and comes with all five fins so you can ride it either way. This is one of the most fun designs ever shaped and it comes in a size range for every surfer.
