

# MAGIC ★ MODEL

Feedback given from high performance longboarders contributed to the design of this model. They were after a lightweight high performance version. The result is a stringerless, SLX carbon rail (SLXC) version of the Magic Model.

SLXC is our highest performance epoxy construction. The SLXC construction provides several ways for us to control the flex in our surfboards the result here is the fastest recoil possible. It reduces the weight of the board down. The strength of the carbon on the rail, three times standard fiberglass, make the board feel extremely alive and responsive under your feet.

The Magic Model Carbon rail is the latest in cutting edge of performance longboarding.

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
8'0"	22"	2 3/4"	57 ltr	7" Centre FCS GL Sides	0-187lbs (0-85kg)
9'0"	22 1/2"	2 3/4"	69 ltr	7" Centre FCS GL Sides	187lbs+ (85kg+)
9'6"	23"	3	82 ltr	7" Centre FCS GL Sides	All Weights
